Canon addresses a top request of the print marketplace with the introduction of the Two-Knife Booklet Trimmer-A1. The accessory is designed for the on-demand market where quality expectations are growing, but turnaround time is shrinking.

Value-added services, such as in-line finishing, can enhance a printed product and provide additional opportunity to generate revenue. The Two-Knife Booklet Trimmer-A1 integrates seamlessly with the Booklet Trimmer-C1 and the Saddle Finisher-AB2 to enable three-sided trimming of full-bleed, saddle-stitched booklets.

The capabilities of this finishing accessory will allow your business to completely produce and finish a greater variety of jobs in-line, without operator intervention. By shortening the time it takes to produce and finish the job in-house, you can meet the tightest deadlines requested by your customers.

Available on a majority of the imagePRESS digital presses, this accessory eliminates the need for costly off-line finishing equipment and offers a solution to grow your business. Current imagePRESS digital press owners utilizing the face trimming ability of the Booklet Trimmer-C1 will be able to upgrade to three-sided trimming with this accessory.

As part of the imagePRESS finishing solutions, the Two-Knife Booklet Trimmer-A1 will help you enhance internal productivity and the competitiveness of your production printing business.
